

GAS-TIGHT MODULAR DUCTING

DUCTING

OVERVIEW

The Arcotech Gas-tight Modular Ducting System is the proper decision when an excessive demand of corrosion resistance and easy installation, is required. This is especially important in air ducting for filtration functions where clean ducts are fundamental for long filter life. The ducting is available in various sizes and in angled mixtures to go well with the customer's requirements. Due to the modular design, the duct system is easy for installation and constantly gives the option for re-configuration after installation.

DESCRIPTION

The duct modular is manufactured from 2 mm sheet metal and finished both inside and out with a highly resistant epoxy powder coating that keeps the ducting free from corrosion. The easy connection with seals and sector flanges between the modular provides a trouble-free assembly. Gas-tight modular ducting is the most price effective way to produce ducting for NBC filtration systems.

APPLICATIONS

Bomb Shelters

Institutes

Shopping Malls

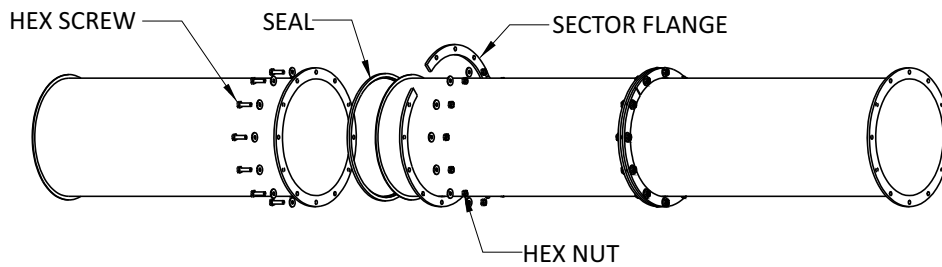

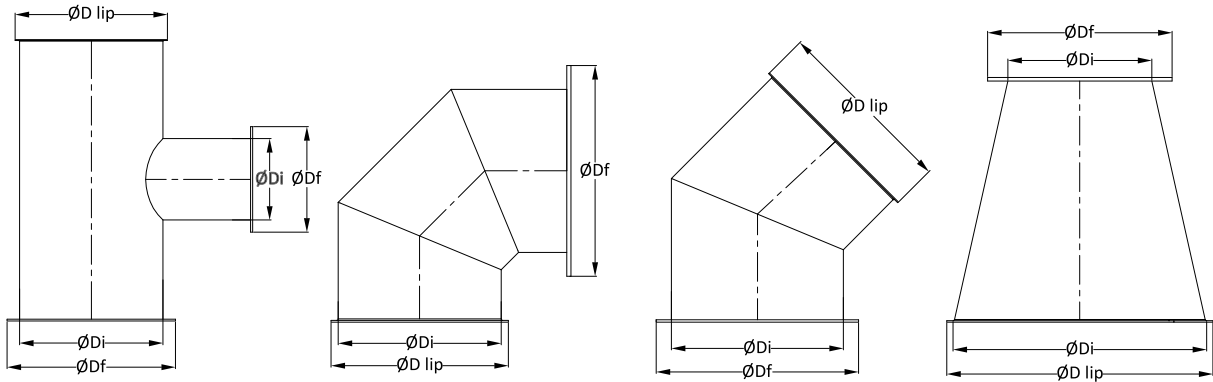

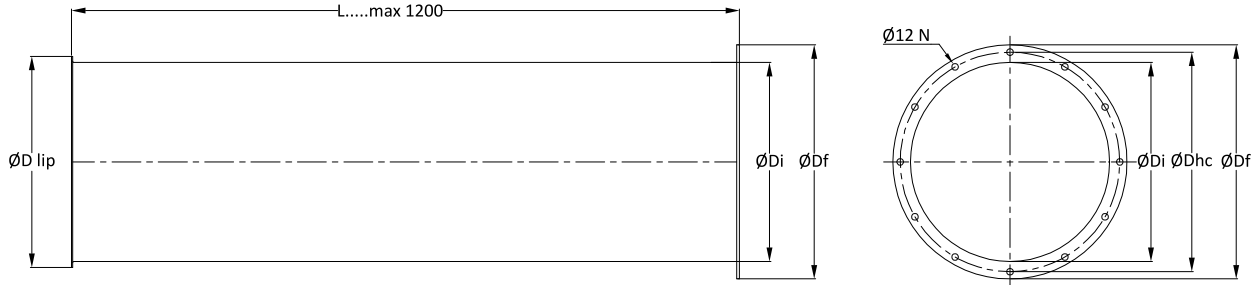

Factories

Multiplex

DIFFERENT TYPE OF DUCTING :

$\varnothing Di$	$\varnothing Df$	$\varnothing D \text{ lip}$	$\varnothing Dh_c$	N
200	264	222	238	8X
250	316	276	292	8X
355	422	381	396	12X
400	486	426	445	12X
500	577	526	542	16X
600	686	626	642	16X
